

## **2010 Western Canada Soybean Trial**

The 2010 WESTERN CANADA SOYBEAN RECOMMENDATION TRIALS will provide regional performance data of registered varieties. The data will be made available to all provinces in Western Canada for possible inclusion in the provincial seed guides.

Only Round-up Ready soybean varieties that will be actively marketed in 2011 are eligible for entry in this trial. For the second year of the trial we are offering to test up to 2 Roundup Ready varieties, free of charge.

### **Trial Locations**

Manitoba – Roblin, Carberry, Hamiota, Boissevain, Melita (run by MAFRI)

Saskatchewan – Outlook (dryland & irrigated), Saskatoon, Oxbow, Rosthern (run by U of S, CSIDC)

Alberta – Bow Island (dryland & irrigated) (run by AAFRD)

Ontario – Thunder Bay (run by TBARS)

The trial will be designed as a Randomized Complete Block with 3 replicates. Most of the cooperators are experienced in growing soybeans but since they are likely be the only soybeans grown in the area, there is the potential for trials to be lost to rabbits, deer and grasshoppers.

**\*\* Please use one form for each entry \*\***

### **Please send seed as soon as possible April 16<sup>th</sup> is the absolute deadline for**

- receipt of bare seed with completed form to:

Keith Murphy
