

Manitoba 4R Nitrogen Management Field Tour

July 29, 2022

A joint event hosted by Manitoba Agriculture, Fertilizer Canada and the 4R Industrial Research Chair Program at the University of Manitoba

- Friesen Field 50W & 20N (N10-4-9W1)
- Look for road signs on Highway #244, just north of Manitou
- Two group showings, 9:00 am and 1pm. Registrants assigned a group
- Close by lunch tent at Mary Jane Reservoir Park (11:30) available for morning group (max 40 for lunch)
- Earn 2.5 CCA Nutrient credits

Come learn with us about...

- Junaid's farm-scale research of fall-applied anhydrous with nitrification inhibitors for canola
- SafariJohn's Magic Nitrogen Machine
- Leo demonstrate the benefit of nitrification inhibitors to reduce N₂O emissions measured in real-time
- See Landon's biological N trial
- Timi's Fall N Decision Tool
- Katrina's demo of hygroscopic nature of fertilizers
- The latest from MCA on the fertilizer use findings
- The 4R Chair results from Mario to achieve emission but not yield reductions
- 4R Incentives from Canola Council of Canada and MAWS
- and much, much more.....
